| <b>Handling:</b>                                                                                    | Handle in accordance with good occupational hygiene and safety practices in well-ventilated areas. Important: Pressurized container; protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Keep away from sources of ignition — No smoking. Do not spray on a naked flame or any incandescent material. Do not spray near fire, sources of heat or live electrical equipment. Electrostatic discharge may cause fire. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Do not breathe spray. Avoid contact with skin and eyes. |                                                                                                    |                                                                                                 |                                                                                                            |                                                                                                   |
| <b>Storage:</b>                                                                                     | Keep frost-free, in a cool (< 35°), dry and well-ventilated place. Protect from sunlight and keep away from heat.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                    |                                                                                                 |                                                                                                            |                                                                                                   |

## FIRST AID MEASURES IF HEALTH EFFECTED:

|                               |                                                                                                                                             |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Skin contact:</b>          | Take off contaminated clothing. Wash off skin with plenty of water and soap before product dries up. Consult a doctor if irritation occurs. |
| <b>Eye contact:</b>           | Wash out with (lukewarm) water for at least 15 minutes. Remove contact lenses. Consult a doctor.                                            |
| <b>Inhalation Drowsiness:</b> | Move victim into fresh air. Consult a doctor if victim feels unwell.                                                                        |
| <b>Ingestion:</b>             | Aerosol/mist: Ingestion is unlikely to occur.                                                                                               |

## FIRE RISK & FIGHTING MEASURES:

|                      |                                                                                         |
|----------------------|-----------------------------------------------------------------------------------------|
| <b>Extinguisher:</b> | Use Carbon dioxide (CO <sub>2</sub> ). Alcohol resistant foam. Dry chemical. Water fog. |
|----------------------|-----------------------------------------------------------------------------------------|

## CONTROL MEASURES IF ACCIDENTAL SPILLAGE:

|                                       |                                                                                                                                                                                                                                                                          |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Spillage:</b>                      | Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Material can create slippery conditions. |
| <b>Condition/ Materials To Avoid:</b> | Stable under normal conditions. No dangerous reaction known under conditions of normal use. Keep away from sources of ignition and sources of heat.                                                                                                                      |

|                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
